

Hydraulic Rebar Cutter

# Hydraulic Rebar Cutter

RC 28

### Description

Combined with Xunkai hydraulic manual pump, mainly used for shearing steel bar, round steel, burglar mesh.

### Application

Accident rescue, especially suitable for traffic accident to forcible entry the driving cab.

### Features

- ▶ Work with manual pump.
- ▶ Body material adopt lightweight high strength aluminum alloy with ceramic coating surface.
- ▶ Large cutting force, can cut Ø16mm round steel, and implement the operation to cut down the small guardrail. High strength and toughness, portable in mini size.
- ▶ The reversing valve equipped with bi-directional self-lock handing, so it can be fixed on any position, no retraction. It makes the operation more convenient and accurate.
- ▶ Key seals imported from Germany.

### Specification

Model	RC 28	
Rated Working Pressure	70 MPa(700bar)	10152 psi
Stroke	28 mm	1.1 in
Max Cutting Capacity (Q235 steel)	Ø16 mm solid round steel	Ø0.63 in solid round steel
Weight	3.5 kg	7.7 lbs
Dimension	282*63.5*49 mm	11.1*2.5*1.9 in
