

Hydraulic Cutter

Hydraulic Cutter

CU 110

Description

With function of cutting, squeezing, and clamping. Tiny central bolt construction for better access to narrow space.

Application

Cutting of metal constructions, vehicle parts, pipes and profiled steel.

Features

- ▶ With super light weight, a backpack can be equipped to quickly enter complex geographical emergency situations such as earthquakes, mountains etc.
- ▶ Mono coupling connection, replace tools freely with pressure. It saves precious rescue time.
- ▶ Tiny central bolt construction for better access to narrow space.
- ▶ Cylinder is made of lightweight high strength aluminum alloy, high strength, small size and lightweight. Cylinder surface treated by hard oxidation technology, anti-abrasion, anti-scratch, high strength.
- ▶ High strength alloy steel blade with outstanding cutting performance for 25mm solid steel.
- ▶ Ergonomic C type blades with strong cutting force, it naturally push the obstacle object to the central position with maximum cut force, and prevent spurting and splashing.
- ▶ Impressively short time opening and closing for quick rescues.
- ▶ The reversing valve equipped with bi-directional self-locking. The handle can auto reset.
- ▶ Key seals imported from Germany.

Specification

Model	CU 110	
Rated Working Pressure	70 MPa (700bar)	10152 psi
Blade Opening	110 mm	4.33 in
Max. Cutting Capacity(Q235 steel)	Ø25 mm	Ø 0.98 in
Weight	< 9 kg	19.8 lbs
Dimension	650*190*160 mm	25.6*7.5*6.3 in
Temperature Range	-30°C~55°C	
Accessories Options	Backpack
