

Hydraulic Combination Tool

# Hydraulic Combi Tool

CT 240

### Description

One tool for spreading, cutting and pulling.

### Application

Traffic accident, air disaster, collapsed building, earthquake etc.

### Features

- ▶ With super light weight, a backpack can be equipped to quickly access the emergency location.
- ▶ Reliable spreading, cutting and pulling without the need of reconfiguration.
- ▶ Mono coupling connection, replace tools freely with pressure.
- ▶ Tiny central bolt construction for better access to narrow space.
- ▶ Cylinder is made of lightweight high strength aluminum alloy, small size and lightweight. Cylinder surface treated by hard oxidation technology, anti-abrasion, anti-scratch, high strength.
- ▶ Impressively short time opening and closing for quick rescues.
- ▶ The multifunctional auxiliary work head with anti-skid design to prevent slippage of the expanded object, easy for confined space operation. The cutting edge with strong cutting force and prevent spurting and splashing.
- ▶ The reversing valve equipped with bi-directional self-locking, so the cutting head can be fixed on any position, no retraction, it makes the operation more convenient and accurate. The handle can auto reset.
- ▶ Key seals imported from Germany.

### Specification

Model	CT 240	
Rated Working Pressure	70 MPa(700bar)	10152 psi
Spreading Distance	240mm	9.4 in
Max. Cutting Capacity	Ø24mm (Round solid steel)	Ø0.94 in
Spreading Force	20-35 kN	4496-7868 lbf
Weight	≤9.5kg	20.9 lbs
Dimension	650*190*160 mm	25.6*7.4*6.3 in
Temperature Range	-30°C~55°C	
Accessories Options	Backpack or frame carrier
