

Hydraulic Universal Compatible Coupling Converter

Description

Made of high strength aluminum alloy, realize the connection and conversion between four different interfaces, satisfy mutual conversion among the interfaces of most current brands.

Application

Hydraulic universal compatible coupling converter for most brands of hydraulic rescue tools.

Features

- ▶ Universal compatible coupling converter is a revolutionary product perfectly solving the coupling compatibility among different interfaces from different suppliers.
- ▶ With this universal converter, hydraulic rescue tools and power units from different manufacturers could be connected together and operate well. Users can choose particularly necessary tools which they want to save big cost.
- ▶ Universal compatibility, equipped with 4 kinds of frequently-used couplings, **compatible with Holmatro, Lukas, Weber, Amkus, Hurst, Genesis, Lancier coupling system.**
- ▶ Compact, light and durable, ultra compact structure, high strength aircraft aluminum alloy makes the converter lightweight and long life
- ▶ With automatic safety relief valve to avoid false operation.
- ▶ Ergonomic carrying handle and shock absorbing and elastic anchor for easy carrying and placing.

Specification

Model	HCC	
Rated Working Pressure	63~72 MPa (630~720 bar)	9137~10442 psi
Working Temperature Range	-32°C~100°C	-32°C~100°C
Weight	≤6 kg	13.2 lbs
Dimension	350*300*130 mm	13.8*11.8*5.1 in.
